Population Health Management for Behavioral Health Organizations

Indiana Council

May 2015

My Background

- Medicaid Director
- Previously DMH Medical Director – 20 years

  Practicing Psychiatrist

  CMHCs – 10 years

  FQHC – 18 years
- Distinguished Professor, Missouri Institute of Mental Health, University of Missouri St. Louis
- Adjunct Professor of Psychiatry – University of Missouri Columbia

Celebrity Endorsements

- "He is not only dull himself, he is the cause of dullness in others.“-Samuel Johnson
- "He uses statistics as a drunken man uses lamp-posts... for support rather than illumination." -- Andrew Lang
- "He can compress the most words into the smallest idea of any man I know." -- Abraham Lincoln

Outline

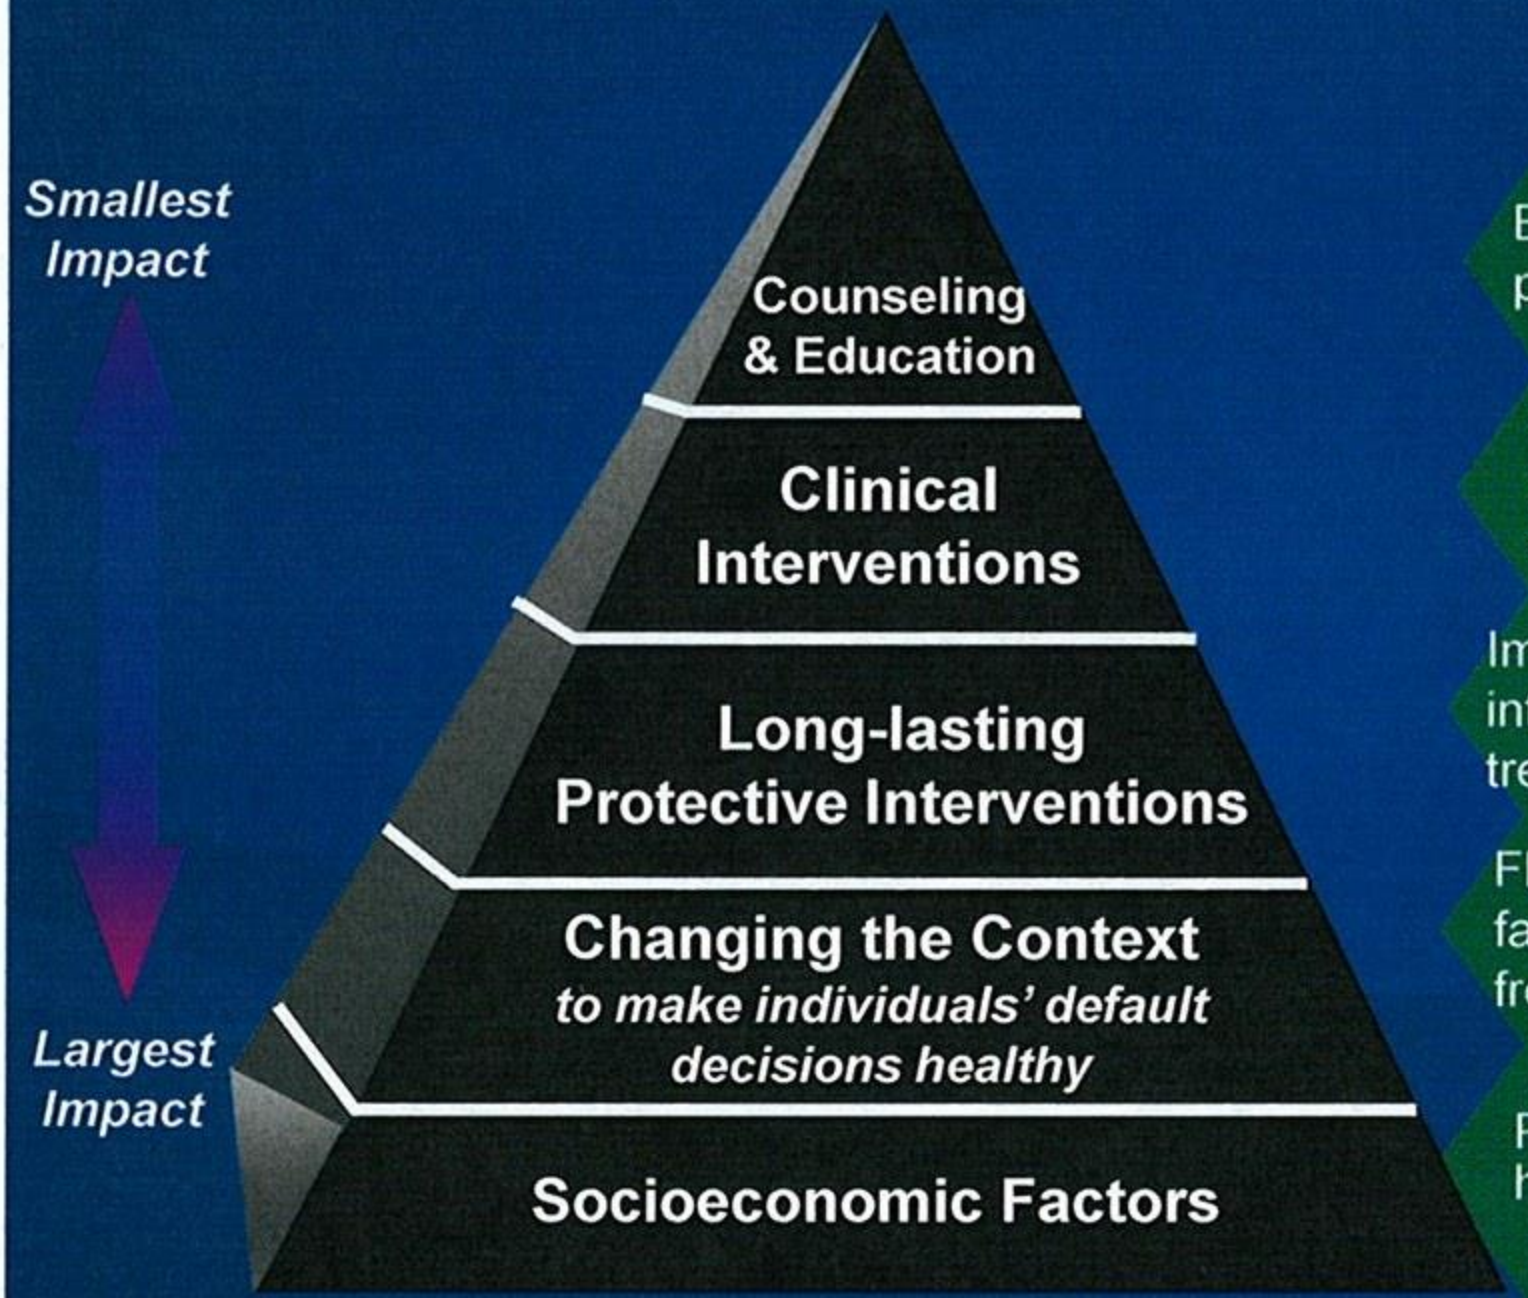
- What Is Population health
- What is population health management
- Why do we need it
  - Good outcomes are dependent on patient behaviors
  - SMI are sicker
  - Psychiatry shortage
- Health home example

Population Health Definitions

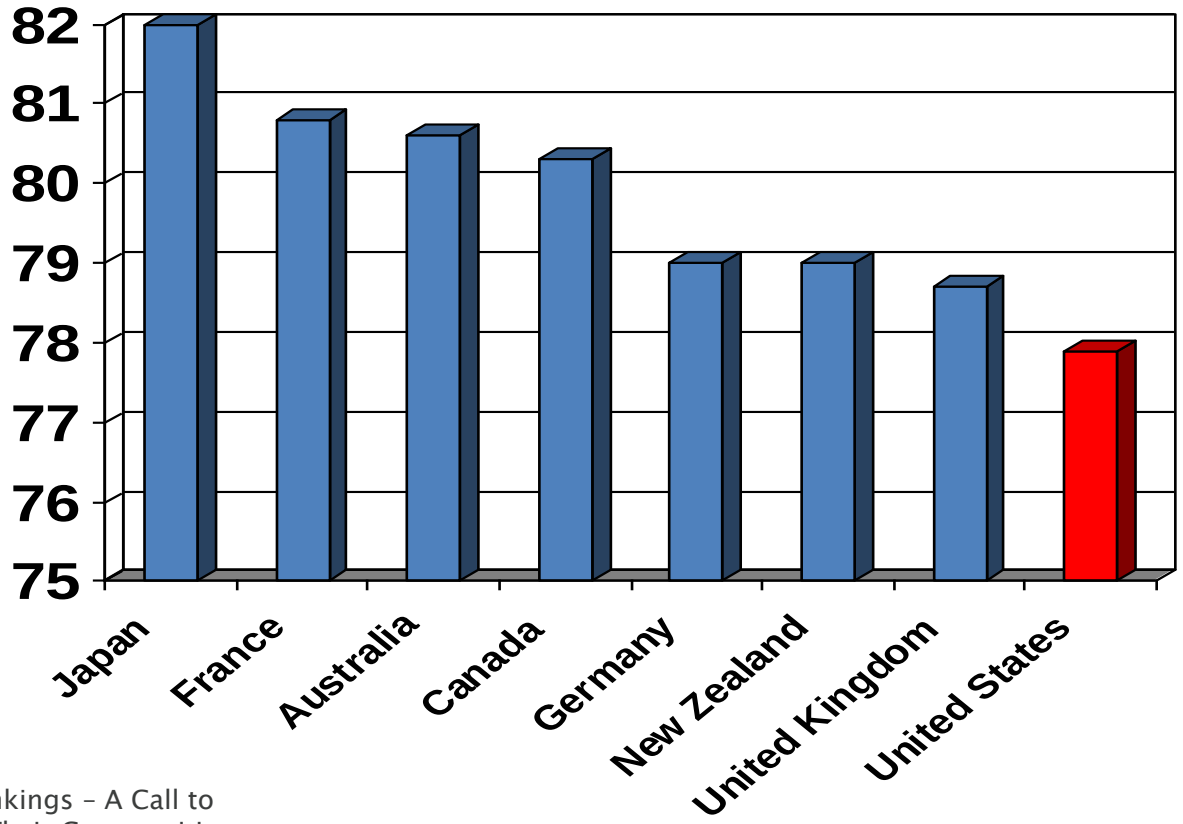
- The health of the population as measured by health status indicators and as influenced by social, economic and physical environments, personal health practices, individual capacity and coping skills, human biology, early childhood development, and health services. (Dunn and Hayes, 1999)

- A conceptual framework for thinking about why some populations are healthier than others as well as the policy development, research agenda, and resource allocation that flow from it (Young 2005)

Factors that Affect Health



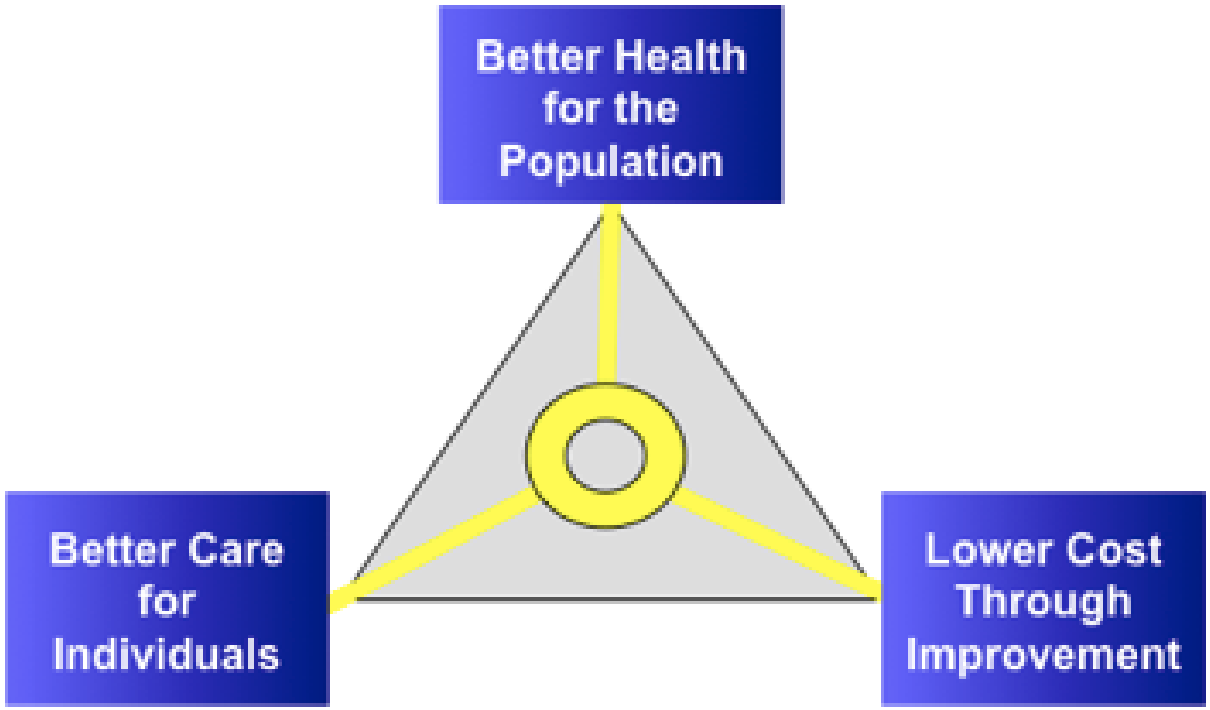
Health Rankings



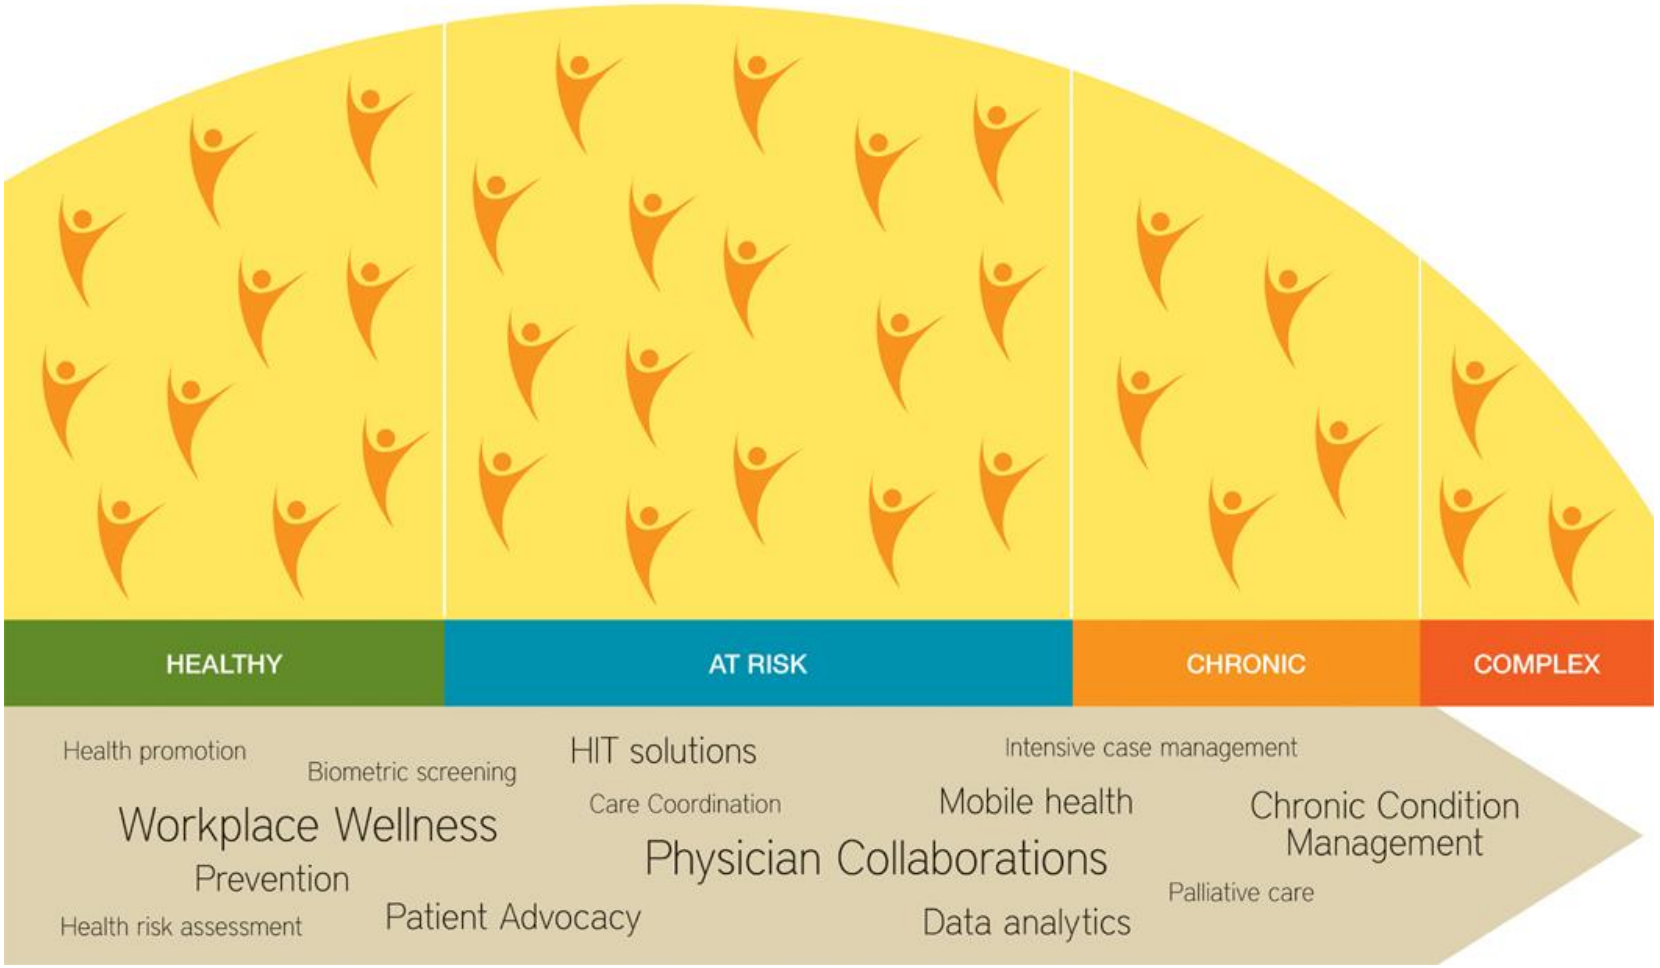
America's Health Rankings – A Call to Action for People & Their Communities
United Health Foundation, 2007

The IHI Triple Aim

Better Care for Individuals, Better Health for Populations, and Lower Per Capita Costs



The Continuum of Care



How do you deliver PHM in any Care Setting?

Assess

Stratify

Implement Solutions

Measure & Report

Population Management Principles

- Population-based Care
- Data-Driven Care
- Evidence-based Care
- Patient Centered Care
- Addressing Social Determinates of Health
- Team Care
- Integration of Behavioral and Primary Care

Population-Based Care

- Don't rely solely on patients to know when they need care and what care to ask for from whom - Use data analytics to outreach to on high need/high utilizer patients
- Don't focus on fixing all care gaps one patient at a time - Choose selected high prevalence and highly actionable individual care gaps for intervention across the whole population
- The population-based health care provider is the public health agency for their clinic population

Data-Driven Care

- Patient Registries
- Risk Stratification
- Predictive Analytics
- Performance Benchmarking
- Data Sharing

Population Management

- Selects those from whole population:
  - Most immediate risk
  - Most Actionable improvement opportunities
- Aids in planning :
  - Care for whole population
  - New Interventions and Programs
  - Early identification and Prevention
  - Choosing and Targeting Health Education

Data Uses

- Aggregate Reporting – performance benchmarking
- Individual drill down – care coordination
- Disease Registry – care management
  - Identify Care Gaps
  - Generate to-do lists for action
- Enrollment Registry – deploying data and payments
- Understanding – planning and operations
- Telling your story – presentation like this

Principles

- Use the Data you have before collecting more
- Show as much data as you can to as many partners as you can as often as you can
  - Sunshine improves data quality
  - They may use it to make better decisions
  - It’s better to debate data than speculative anecdotes
- When showing data ask partners what they think it means
- Treat all criticisms that results are inaccurate or mis-leading as testable hypotheses

More Principles

- Tell your data people that you want the quick easy data runs first. Getting 80% of your request in 1 week is better than 100% in 6 weeks
- Treat all data runs as initial rough results
- Important questions should use more than one analytic approach
- Several medium Data Analytic vendors/sources is better than on big one
- Transparent Bench Marking improves attention and increases involvement

Most Important Principle

- Perfect is the Enemy of Good
- Use an Incremental Strategy
- If you try figure out a comprehensive plan first you will never get started
- Apologizing for a failed prompt attempt is better than is better than apologizing for missed opportunity

PLANNING

MUCH WORK REMAINS TO BE DONE BEFORE WE CAN ANNOUNCE
OUR TOTAL FAILURE TO MAKE ANY PROGRESS.

Six Population Health Management Services

- *Care Management*
- *Care Coordination*
- *Managing Transitions of Care*
- *Health Promotion*
- *Individual and Family Support*
- *Referral to Community Services*

Comprehensive Care Management

- Identification and targeting of high-risk individuals
- Monitoring of health status and adherence
- Identification and targeting care gaps
- Individualized planning with the patient

Step 1 – Create Disease Registry

- Get Historic Diagnosis from Admin Claims
- Get Clinical Values from Metabolic Screening, clinical evaluation and management, care plans
- Combine into EHR Disease Registry (Central Data Registry, PROACT)
- Online Access available to all Providers

Step 2 – Identify Care Gaps and ACT!

- Compare Combined Disease Registry Data to accepted Clinical Quality Indicators
- Identify Care Gaps
- Sort patients groups with care gaps into agency specific To-Do lists
- Nurse care manager helps team decide who will act
- Set up indicated visits and pass on info with request to treat

Care Coordination

- Coordinating with the patients, caregivers and providers
- Implementing plan of care with treatment team
- Planning hospital discharge
- Scheduling
- Communicating with collaterals

Allowable Uses - TPO

Core Health Care Activities for which health information can be used/shared with or without patient consent under HIPAA to avoid unnecessary interference with access to quality health care:

- **Treatment**
- **Payment**
- Healthcare **Operations**

Treatment (45 CFR 164.5010)

- Treatment means the
  - provision,
  - coordination, or
  - management

- Of health care and related services by one or more health care providers, including
  - coordination or management of health care by a health care provider with a third party;
  - consultation between health care providers relating to a patient; or
  - referral of a patient for health care from one health care provider to another.

Treatment

- Authorizations are not needed to use or disclose Personal Health Information (PHI) for treatment purposes.

- Treatment, by design, is broadly defined.

- Treatment covers the coordination or management of health care among providers or a third party “related service”.

Treatment

- Treatment includes not just health care, but, also, “related services.”
- “Related services” can include social, rehabilitative or other services associated with health care.
- HHS believes disclosures for treatment purposes are appropriate for timely and quality treatment.

Treatment

The following, when undertaken on behalf of a single consumer (not a population) are treatment activities:

- Case management;
- Care coordination;
- Disease management;
- Health promotion; and
- Outreach programs

Surprising Truth about Treatment, Health Care Operations, and Payment

- Individuals have the right to request restrictions on how a covered entity will use and disclose PHI about them for treatment, health care operations, and payment.

- A covered entity is not required to agree to an individual's request for restriction, but is bound by any restrictions to which it agrees. (45 CFR 164.522(a))

A word about “Liability”

- Both 42 CFR Part 2 **and** HIPAA are frequently interpreted in an unnecessarily restrictive manner by Privacy Officers and Organizations General Counsel
- An Important Distinction for CEOs
  - Courts give Orders
  - Your lawyers give **Advice**
- CEOs must manage and balance many types of liability
  - Financial - Legal - Operational
  - Clinical - Public Relations

Why Behavioral Health Needs Population Management

- ACA Requires It
- SMI are sicker
- Population Management needs BH
- Psychiatry shortage

Healthcare Reform

Moving Toward an Accountable Health Care System

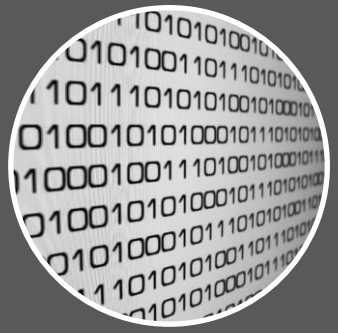
Coverage for All

Payment Reform

Align incentives

Pay for Value

Strengthen Primary Care



Improve Quality and Support Innovation

Tools to Rebuild and Restructure Health Care

Population Health Management in the ACA

- Community Health Needs Assessment requirements
- Expansion of prevention and wellness services
- Hospital Readmissions Reduction Program
- Community-based Care Transitions Program
- Accountable Care Organizations
- Patient Centered Medical Homes
- Health Homes for Chronic Conditions
- Increased funding for health centers

A Quick Overview of Assumption of Risk Models

Model 1: <u>Typical</u> Self-Insured Employer

Purchaser:	Employer- **Risk Stays Here**
Payer:	Intermediary/TPA
Billing Provider:	Provider/Network/System
Health Care Worker:	Practitioner/Employees

A Quick Overview of Assumption of Risk Models

Model 2: <u>Typical</u> Uninsured

Purchaser:	Patient-**Risk Stays Here**
Payer:	None
Billing Provider:	None
Health Care Worker:	Practitioner/Employees

A Quick Overview of Assumption of Risk Models

Model 3: <u>Typical</u> Insurance

Purchaser: Employer/Taxpayer/Individual

↓

(Risk)

↓

Payer: Insurance Company

Billing Provider: Provider/Network/System

Health Care Worker: Practitioner/Employees

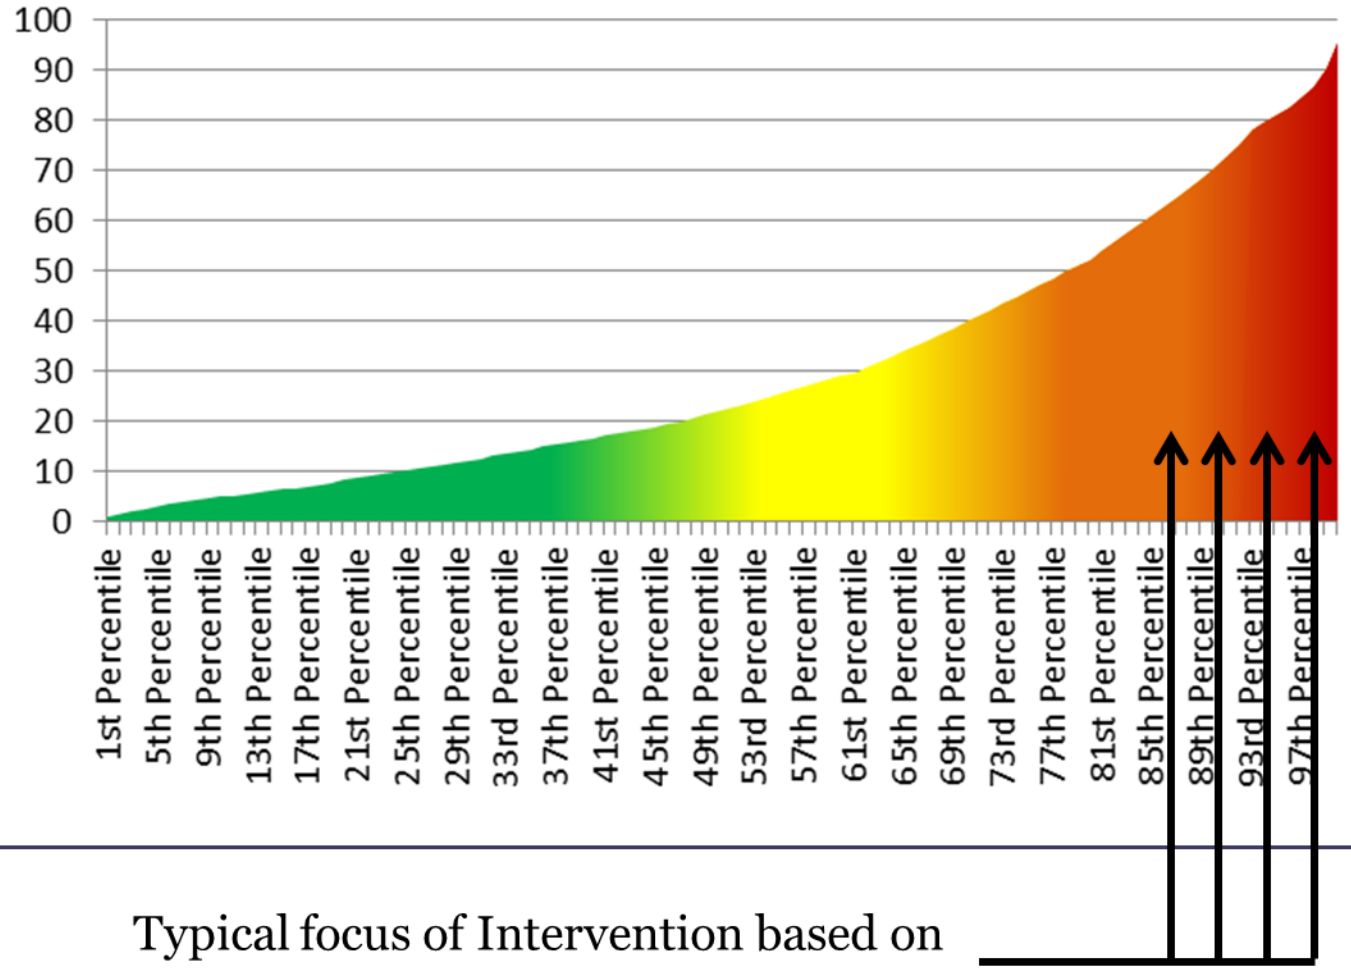
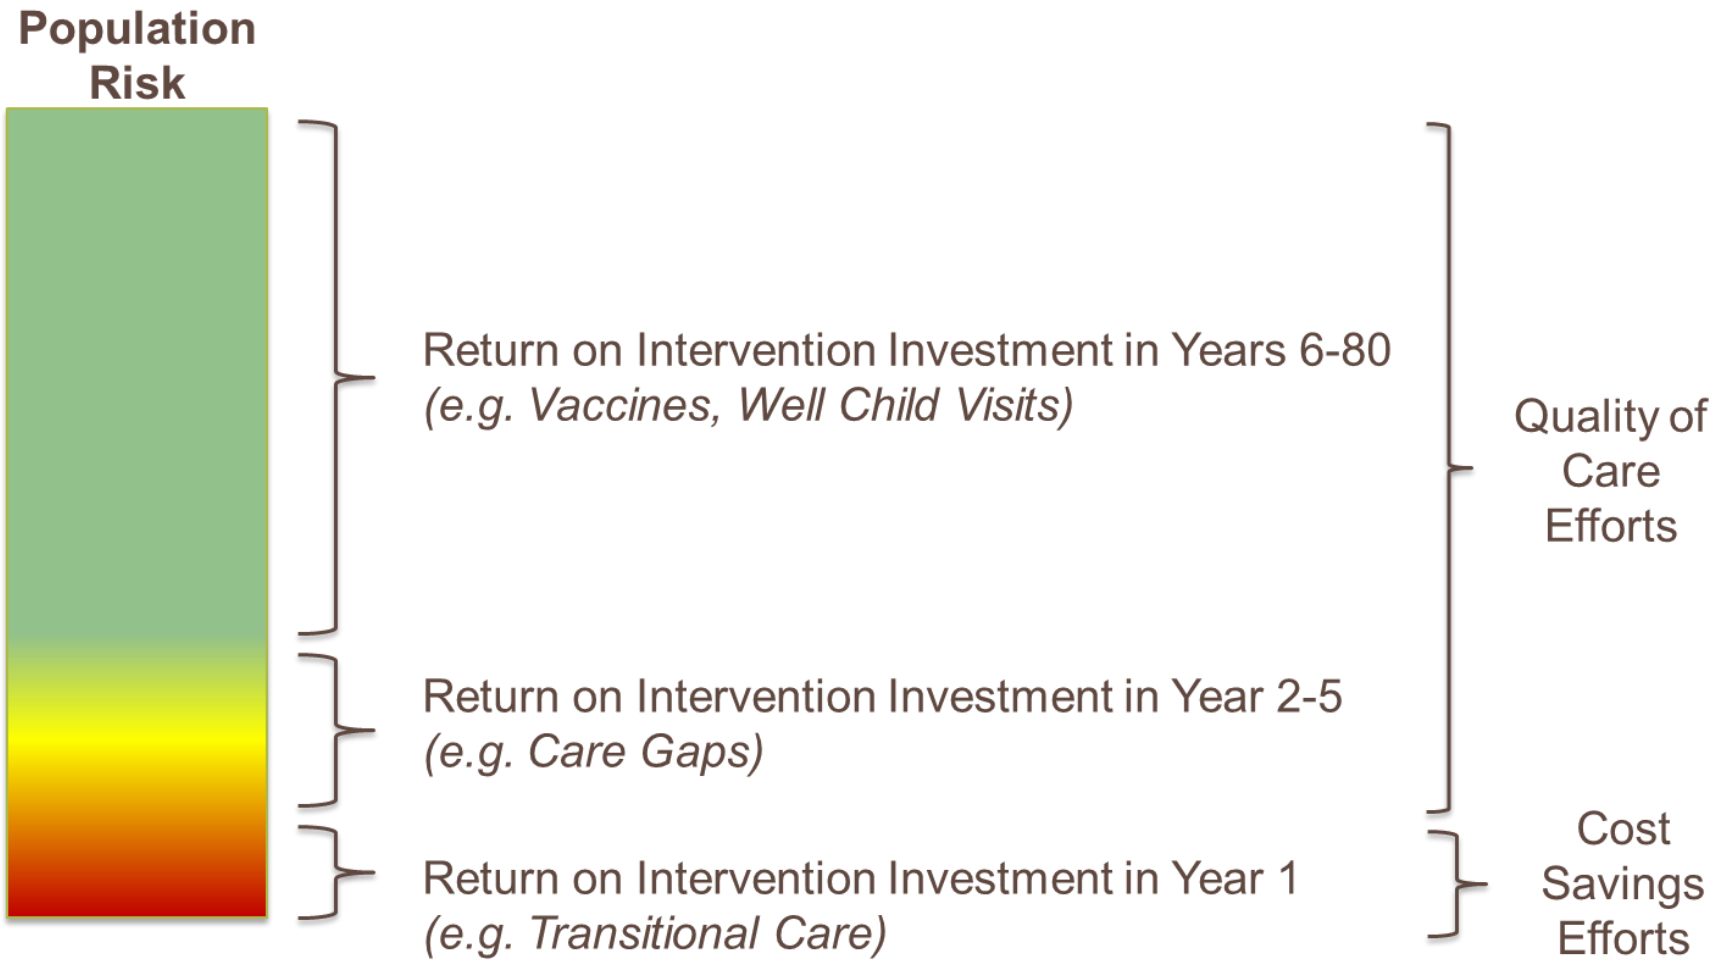
Global Need for Comprehensive Medication Management

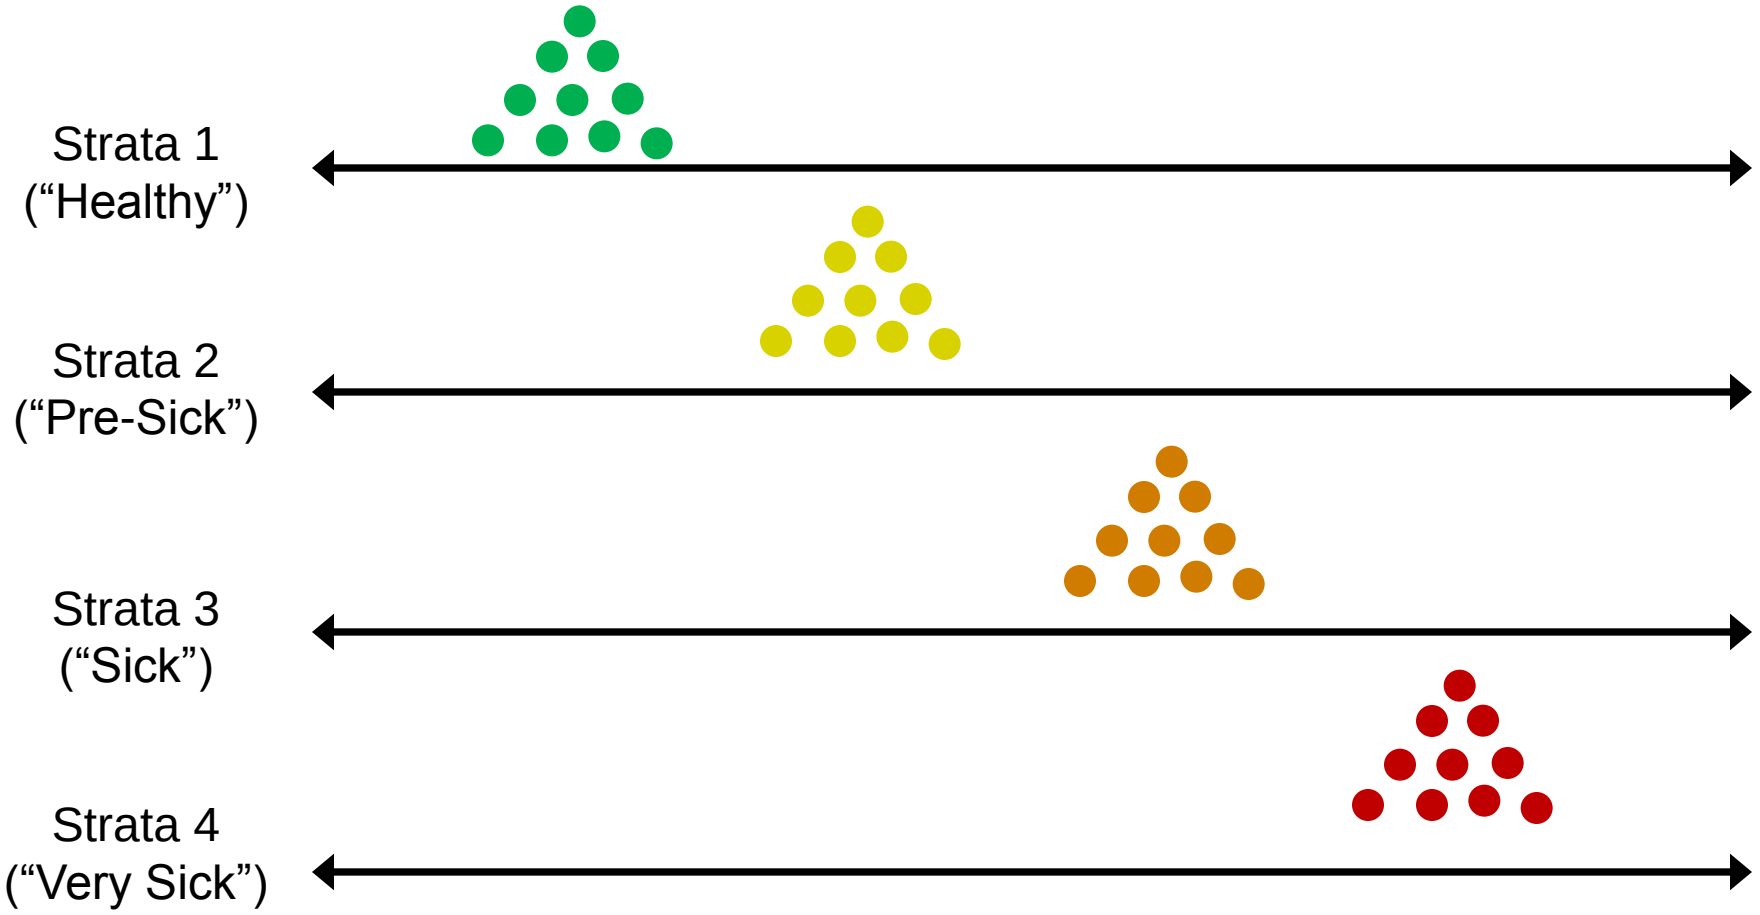


Typical focus of Intervention based on Patient Need/Response

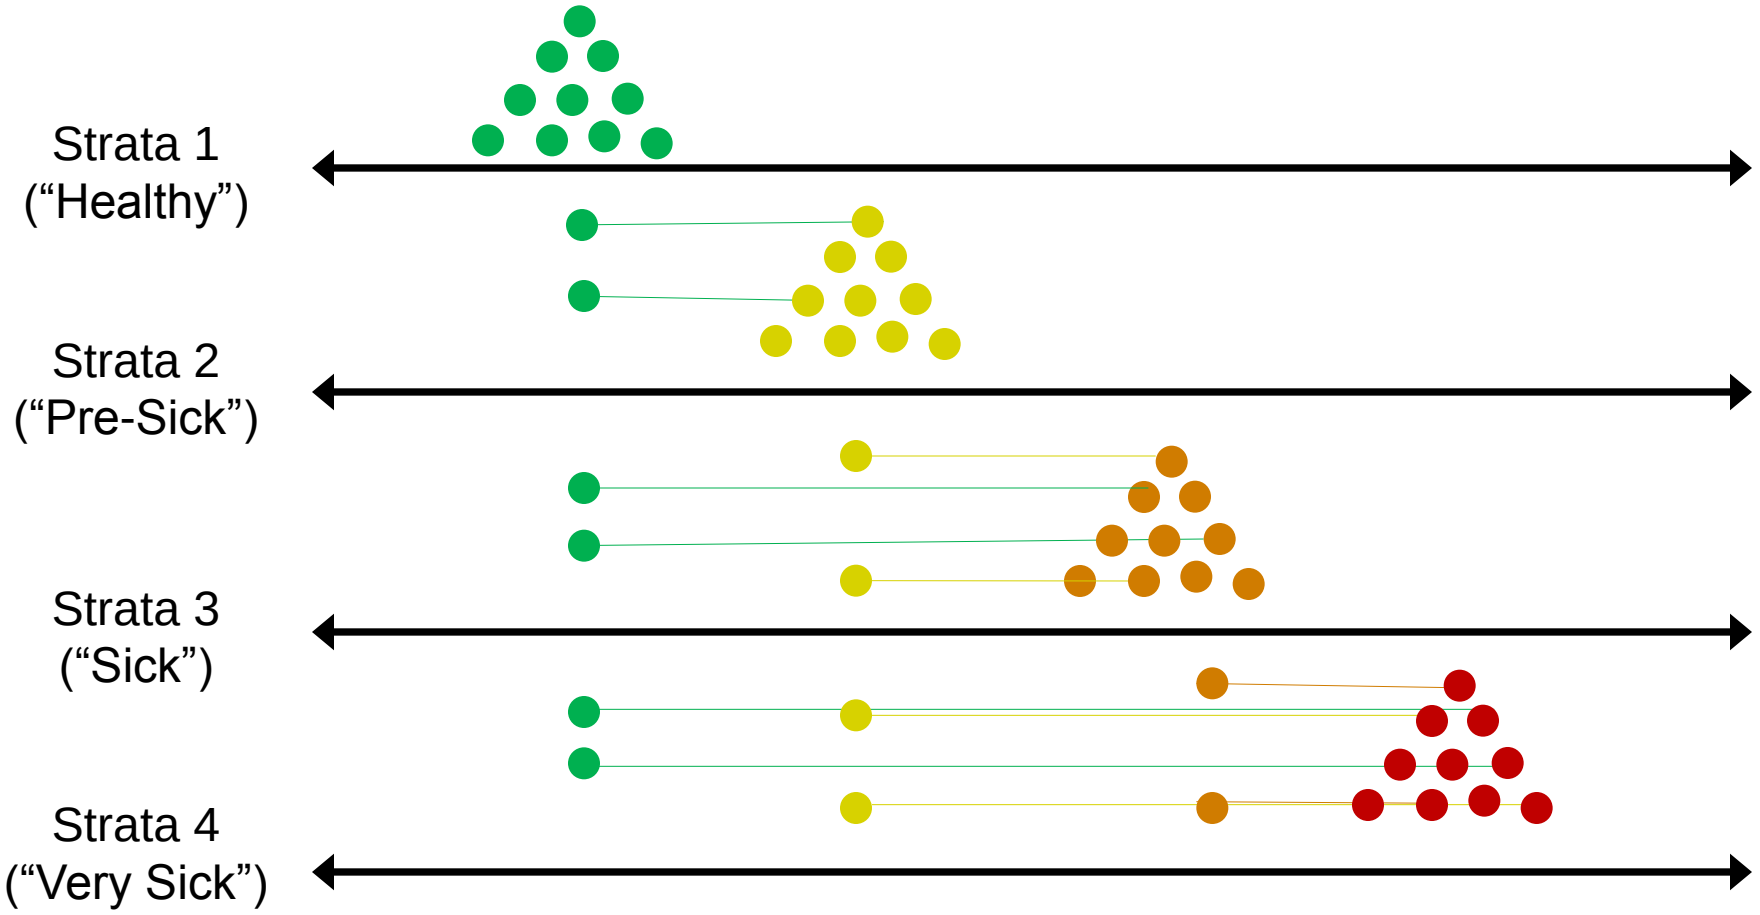
Risk Time Horizon



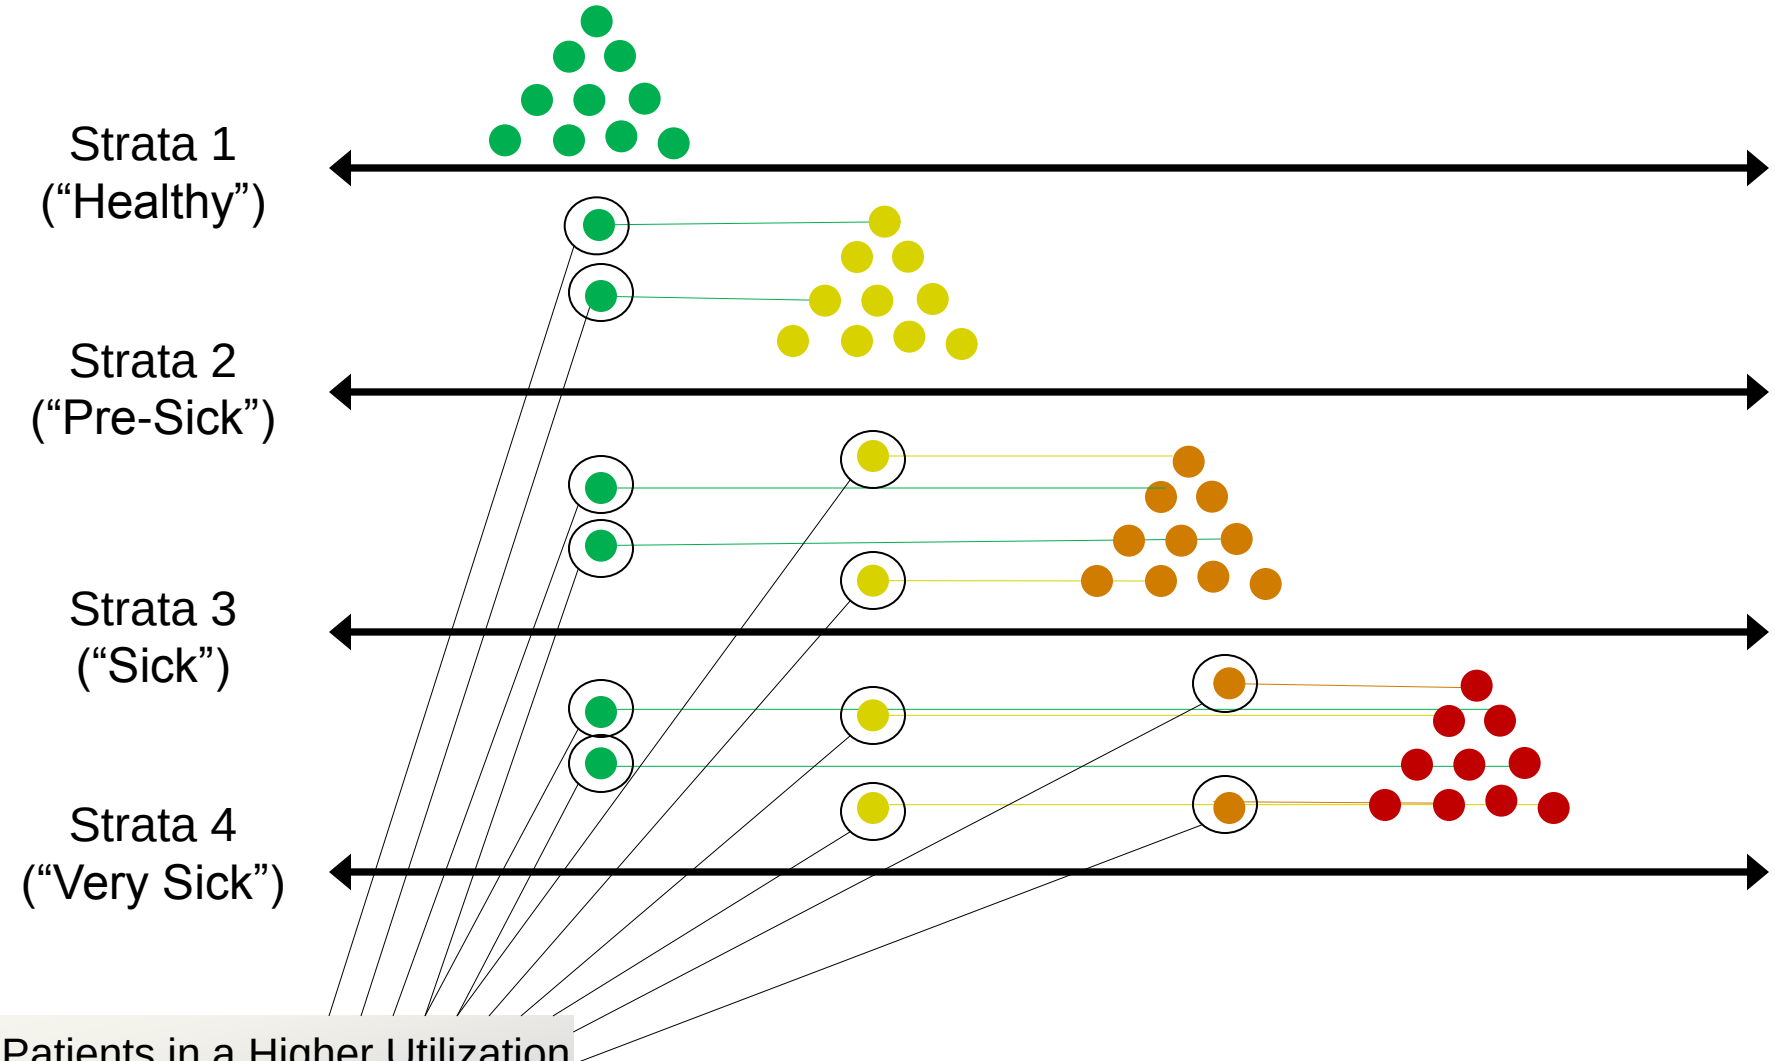
Intrinsic Risk vs. Modifiable Risk



Intrinsic Risk vs. Modifiable Risk



Intrinsic Risk vs. Modifiable Risk



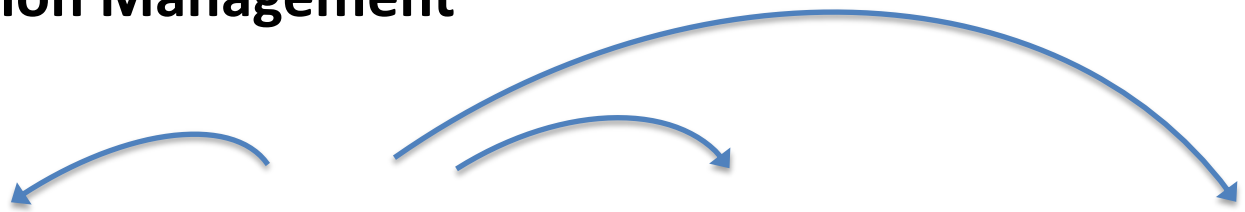
Patients in a Higher Utilization Strata than Their Inherent Risk

…from encounters…to ongoing management

Fee-For-Service

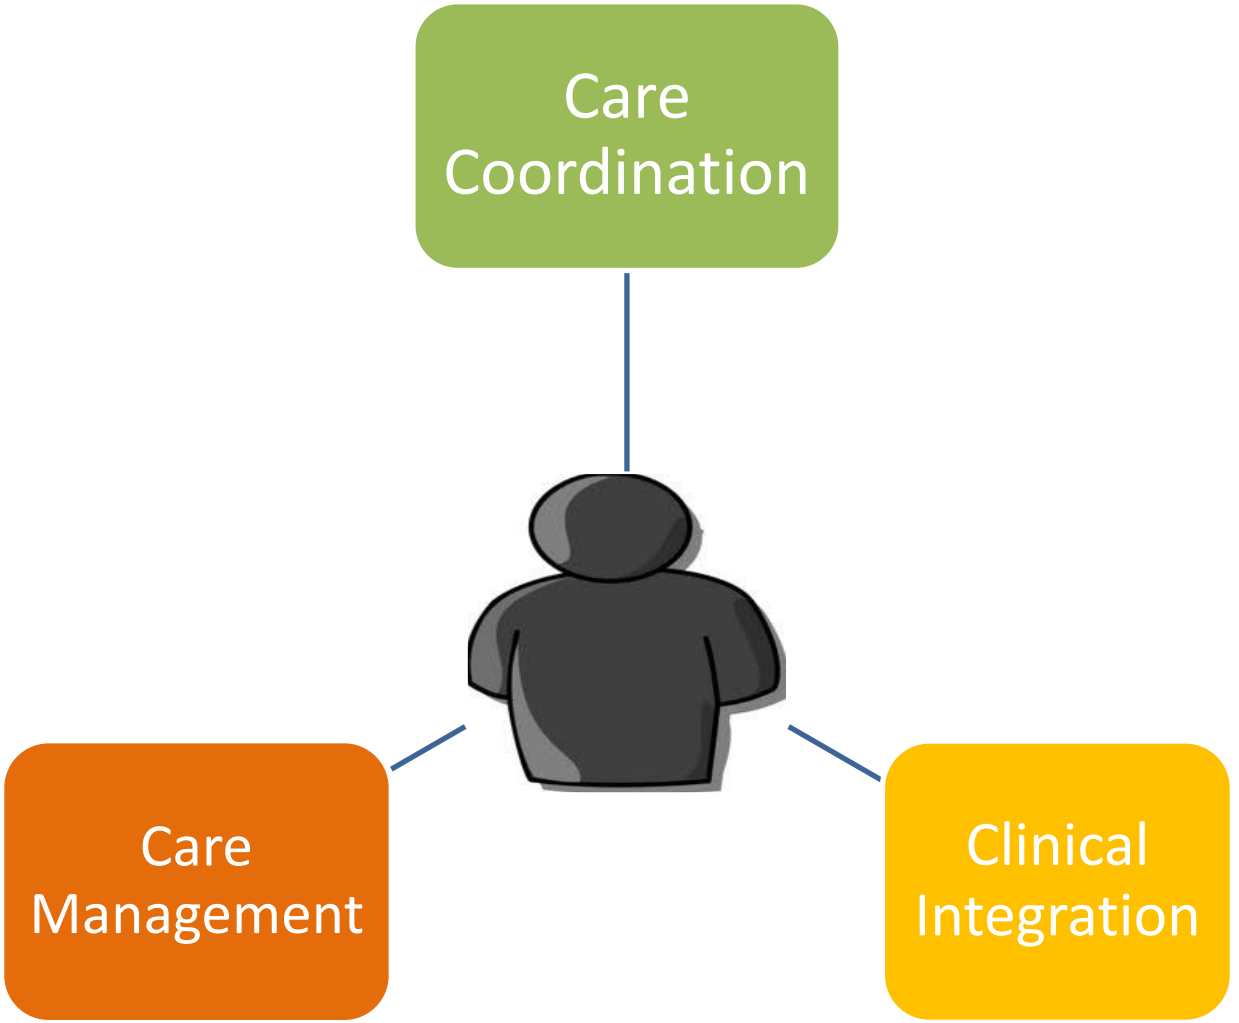
Pre-Encounter	Encounter	Post-Encounter	Disengaged
X	$$$$$	X	X

Population Management



Pre-Encounter	Encounter	Post-Encounter	Disengaged
$	$$	$	$

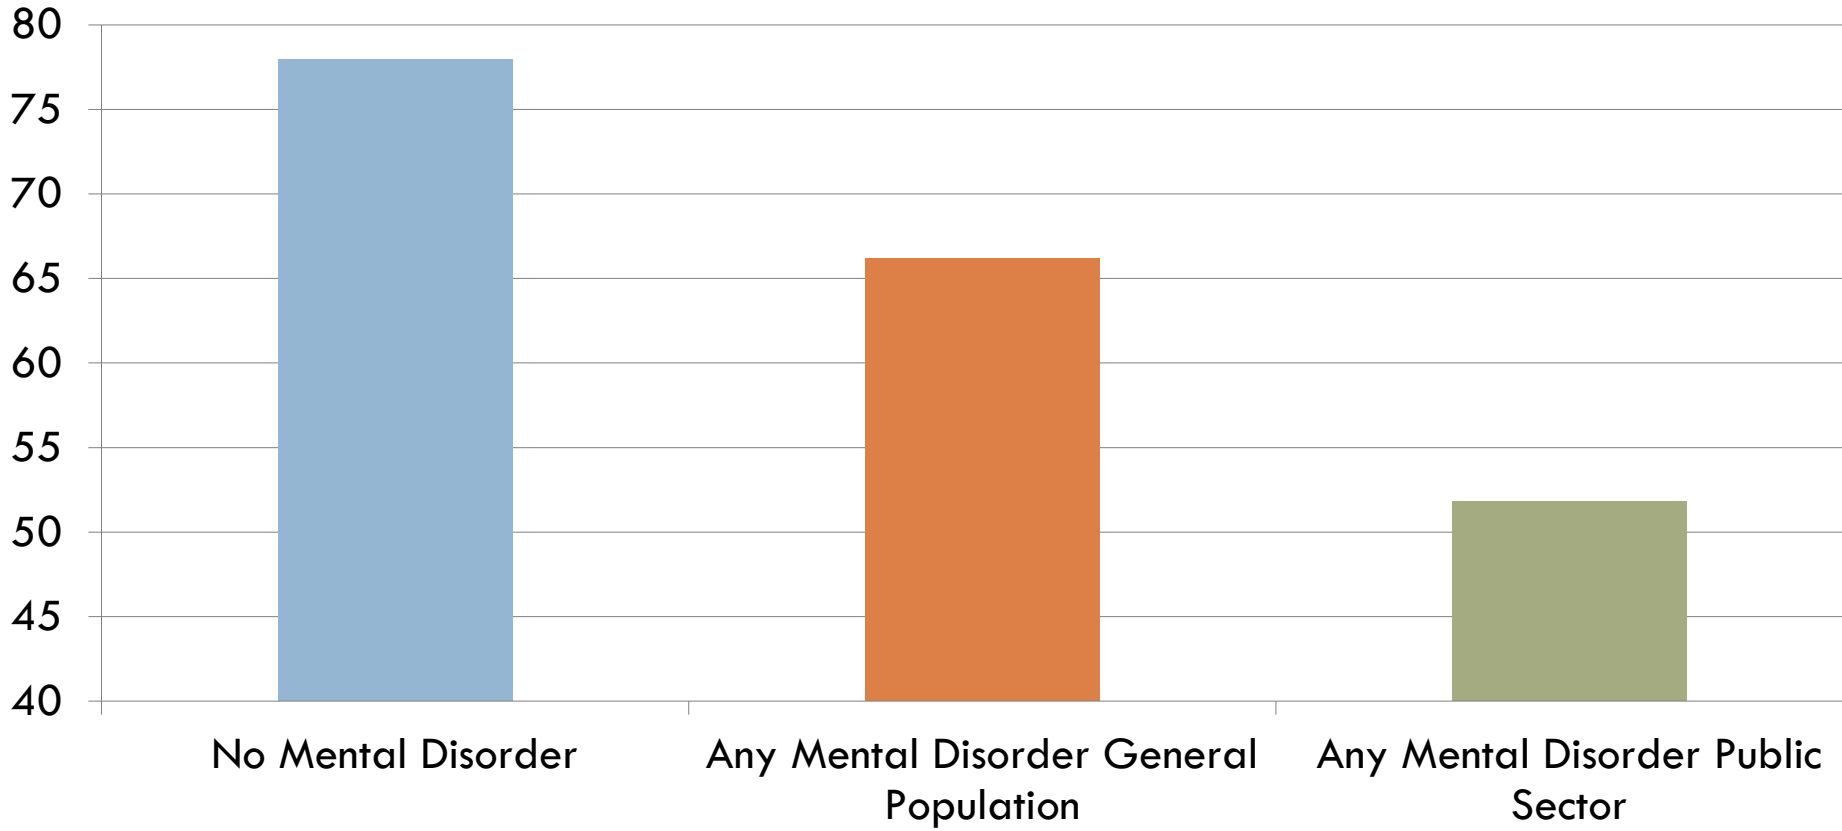
Important Provider Competencies



Characteristics:

- **Outcomes-oriented**
- **Enabled by technology**
- **Patient - centered**
- **Use of data and analytics**
- **Performance transparency**
- **Ability to partner across organizations**

Life Expectancy



Bar 1 & 2: Druss BG, Zhao L, Von Esenwein S, Morrato EH, Marcus SC. Understanding excess mortality in persons with mental illness: 17-year follow up of a nationally representative US survey. Med Care. 2011 June;49(6):599-604

Bar 3; Daumit GL, Anthony CB, Ford DE, Fahey M, Skinner EA, Lehman AF, Hwang W, Steinwachs DM. Pattern of mortality in a sample of Maryland residents with severe mental illness. Psychiatry Res. 2010 Apr 30;176(2-3):242-5

Comparison of Metabolic Syndrome Prevalence in Fasting CATIE Subjects and Matched NHANES III Subjects

	Males			Females		
	CATIE N=509	NHANES N=509	*p*	CATIE N=180	NHANES N=180	*p*
Metabolic Syndrome Prevalence	36.0%	19.7%	.0001	51.6%	25.1%	.0001
Waist Circumference Criterion	35.5%	24.8%	.0001	76.3%	57.0%	.0001
Triglyceride Criterion	50.7%	32.1%	.0001	42.3%	19.6%	.0001
HDL Criterion	48.9%	31.9%	.0001	63.3%	36.3%	.0001
BP Criterion	47.2%	31.1%	.0001	46.9%	26.8%	.0001
Glucose Criterion	14.1%	14.2%	.9635	21.7%	11.2%	.0075

Meyer et al., Presented at APA annual meeting, May 21-26, 2005.
McEvoy JP et al. Schizophr Res. 2005;80:19-32.

The CATIE Study

At baseline investigators found that:

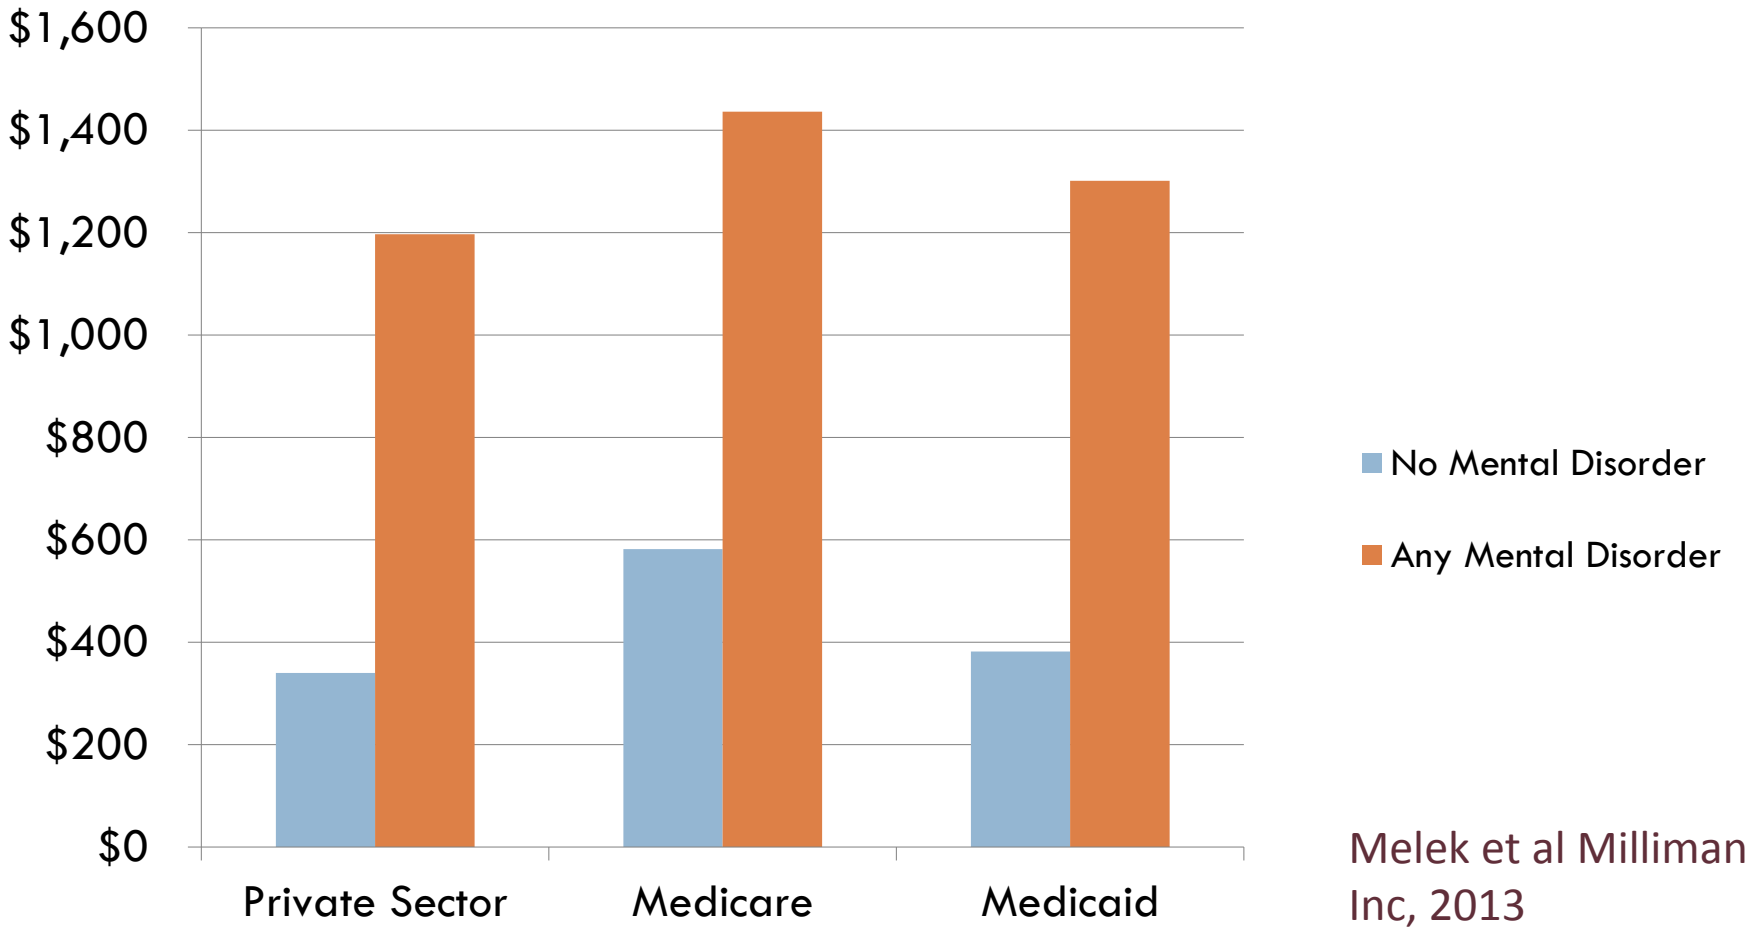
- **88.0%** of subjects who had dyslipidemia
- **62.4%** of subjects who had hypertension
- **30.2%** of subjects who had diabetes

were NOT receiving treatment.

Causes of Excess Mortality

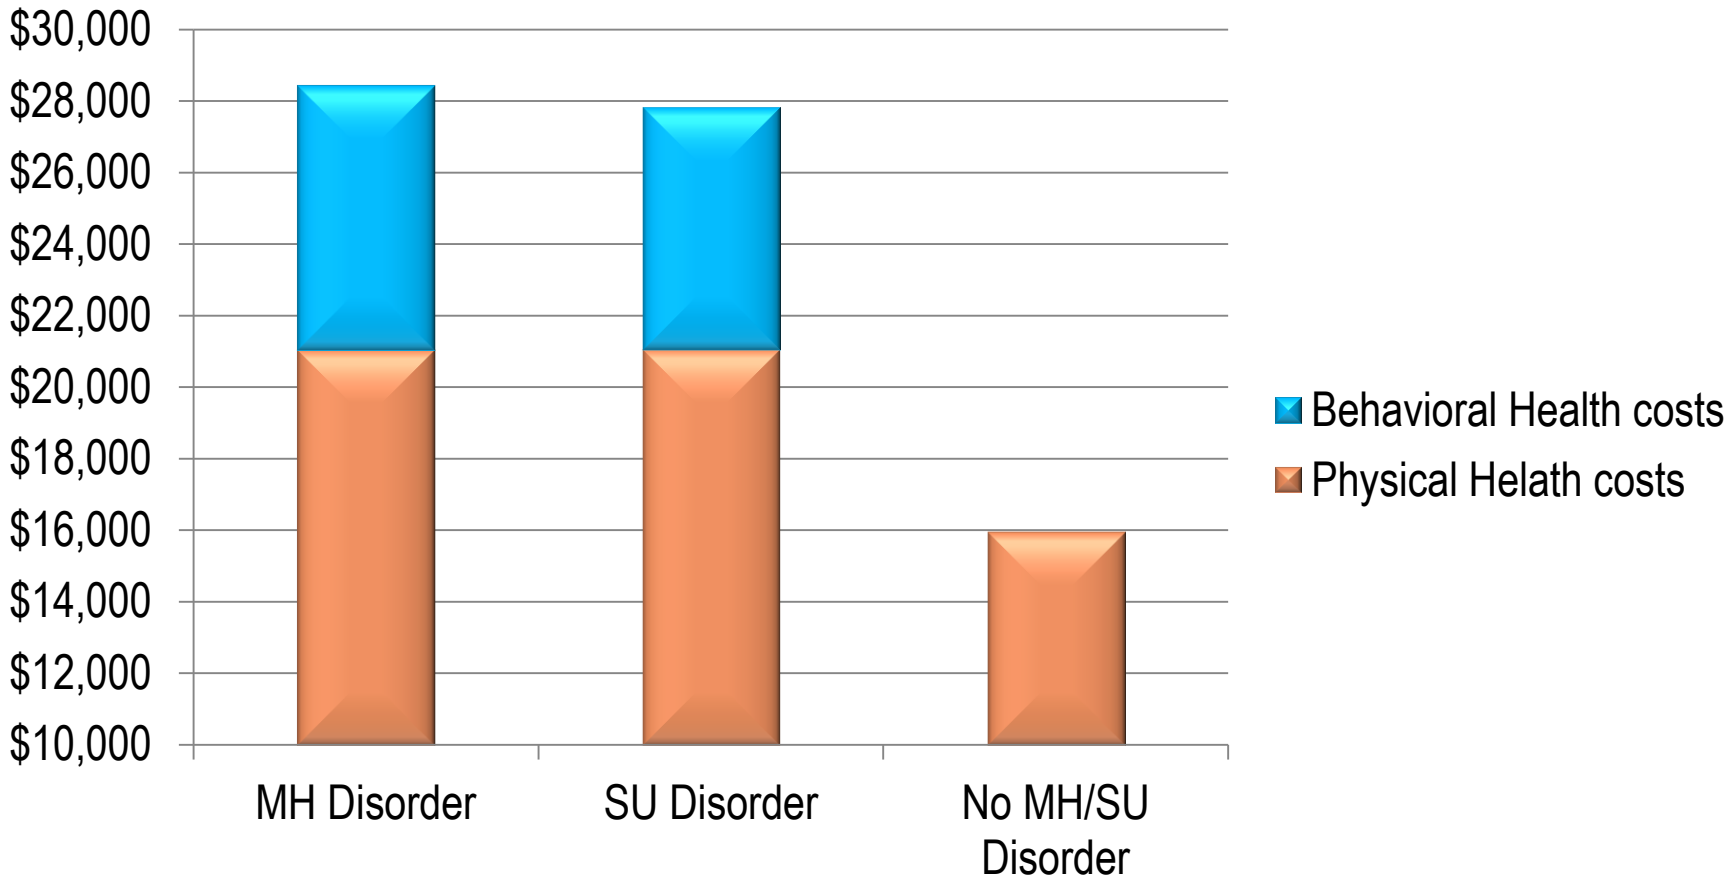
- Smoking
- Obesity
- Inactivity
- Polypharmacy
- Under Diagnosis of Medical Conditions
- Inadequate Treatment of Medical Conditions

Per Member Per Month Costs

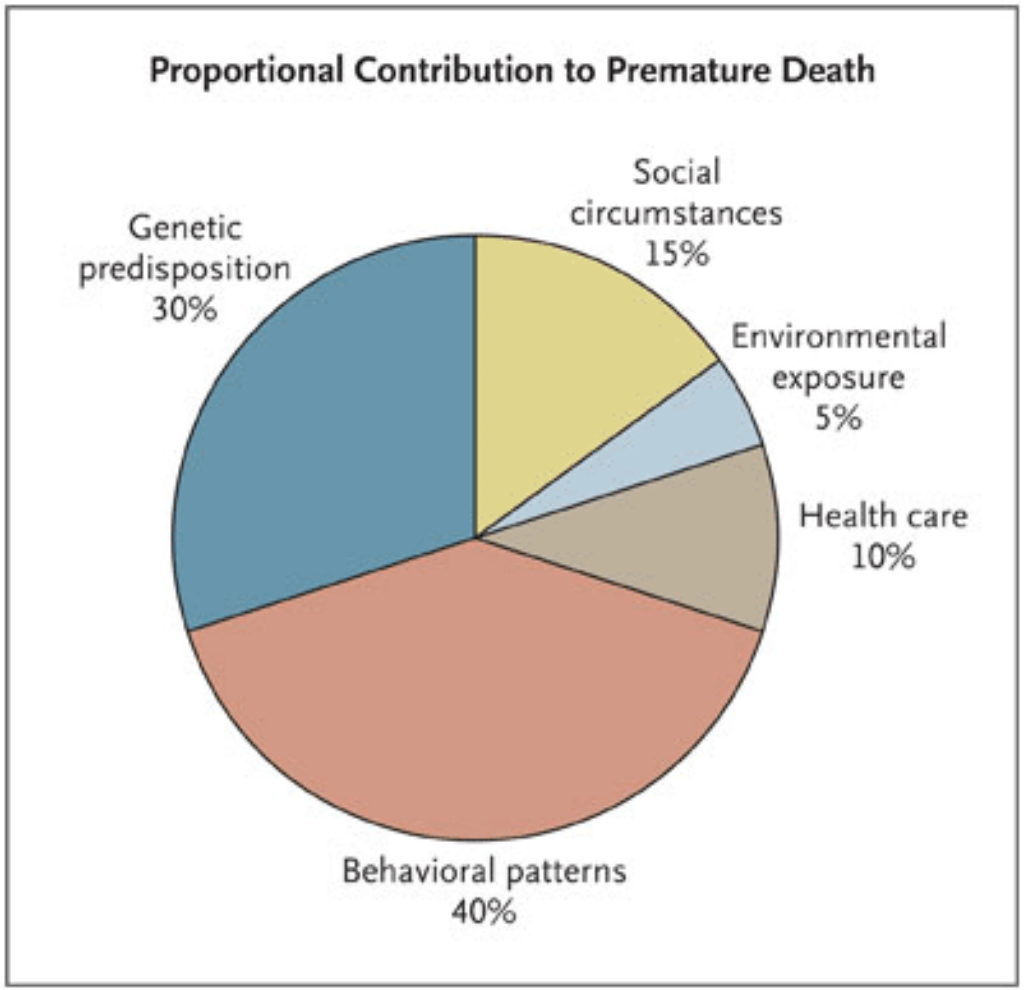


Melek et al Milliman Inc, 2013

MH/SU costs in NY State's Medicaid Program



Determinants of Health



Determinants of Health and their Contribution to Premature Death, Adapted from McGinnis, et al., 2002

Drivers of Increased Demand

- Increased Coverage
  - Wellstone Domenici Parity Act
  - ACA
- Increased Demand
  - Stigma continues to drop releasing pent up demand
  - Press coverage of mass shootings - increasing mental health services is more popular than gun control
- Focus of High Utilizers
- Increased desire for integration by payers
- Shrinking Psychiatric Workforce

What is a Health Home?

- Not just a Medicaid Benefit
- Not just a Program or a Team
- A System and Organizational Transformation

Population Based

- Payments for HH services will be paid PMPM, not unit by unit
- Service needs will be identified by patient health history and status
- Outcomes will be measured by groups of clients (i.e., by organization, region, medication used, co-morbid conditions)

Health Care Home Strategy

- Case management coordination and facilitation of healthcare
- Primary Care Nurse Care Managers
- Disease management for persons with complex chronic medical conditions, SMI, or both
- Behavioral Health management and behavior modification as related to chronic disease management for persons with Medical Illness
- Preventive healthcare screening and monitoring by MH providers
- Integrated Primary Care and Behavioral Healthcare

Health Home Strategy

- Health technology is utilized to support the service system.
- “Care Coordination” is best provided by a local community-based provider.
- MH Community Support Workers who are most familiar with the consumer provide care coordination at the local level.
- Primary Care Nurse Care Managers working within each Health Home provide system support.
- Behavioral Health Consultants in each Primary Care Health Home
- Statewide coordination and training support the network of Health Homes.

What is Different about Health Homes?

Treatment as Usual

- Individual Practitioner
- Episodic Care
- Focus on Presenting Problem
- Referral to meet other Needs
- Managed Care
  - Manages access to care
  - Does not change clinical practice

Health Homes

- Integrated Primary/Behavioral Health Care Team
- Continuous Care
- Comprehensive Care Management
  - Coordinates care across the healthcare system
  - Data driven population management
  - Transforms clinical practice
  - Emphasizes healthy lifestyles and self-management of chronic health problems

Health Home

Target Populations

- Patients with Diabetes
  - At risk for cardiovascular disease and a BMI > 25
- Patients who have two of the following
  - COPD/Asthma
  - Diabetes (also as single condition)
  - Cardiovascular Disease
  - BMI>25
  - Developmental Disabilities
  - Use Tobacco

Primary Care Health Homes

- Individuals with a serious mental illness; or with other behavioral health problems who also have

–Diabetes
–COPD/Asthma
–Cardiovascular Disease
–BMI>25
–Developmental Disabilities
–Use Tobacco

CMHC Healthcare Homes

Missouri's Health Homes

- Providers
  - 18 FQHCs
    - 67 Clinics
  - 6 Hospitals
    - 22 Clinics
    - 14 Rural Health Clinics
- Enrollment
  - 15,526 adults
  - 428 children
  - 15,954 total

Primary Care Health Homes

- Providers
  - 28 CMHCs
    - 120 Clinics/Outreach Offices
- Enrollment
  - 16,611 adults
  - 2,387 children
  - 18,998 total

CMHC Healthcare Homes

Health Home Team

- Nurse Care Managers (1FTE/250pts)
- Care Coordinators (1FTE/500pts)
- Health Home Director
- Behavioral Health Consultants (primary care)
- Primary Care Physician Consultant (behavioral health)
- Learning Collaborative training
- Next day notification of Hospital Admissions

Six CMS Required Health Home Functions

- *Care Management*
- *Care Coordination*
- *Managing Transitions of Care*
- *Health Promotion*
- *Individual and Family Support*
- *Referral to Community Services*

HCH Responsibilities

Hospital Admissions

- The importance of following up on hospital discharges
- A joint letter prepared by the Mo Hospital Association and Mo HealthNet was distributed to all hospitals describing the Health Home initiative and encouraging hospital cooperation.
- A draft Memorandum of Understanding has been distributed to your CMHC administration to use as a guide in developing an MOU with hospitals serving your area.

HCH Responsibilities

Hospital Admissions

- Hospitals are required by most payers, including Missouri Medicaid, to contact the payer at the time of admission to receive an Initial Authorization of Stay
- All-new authorizations for inpatient care are sent in an overnight flat file data transfer from the Inpatient Authorization Unit to the Health Home analytics unit
- An access database is used to automatically sort the patients by health home and generate an automated email listing those patients with new authorizations to each Health Home Director
- HCHs receive daily e-mails regarding hospital admissions

HCH Responsibilities

Hospital Admissions

- HCH members discharged from the hospital must have a contact within 72 hours of discharge
  - This contact may be made by the individual's CSS, case manager, or NCM
- Nurse Care Managers must complete a medication reconciliation on HCH members discharged from the hospital
  - Information regarding the enrollees medications may be collected by the individual's CSS or case manager for review by the NCM

Hospital Admissions

Following Up is Complicated

- False Positives and Missing Data
  - Late notification
  - Appealing denials
  - Dual Eligibles
- Working with multiple hospitals
  - Barnes Hospital had admissions from half of the HCHs
  - Pathways had admissions to 38 hospitals in one month
  - BJC and Crider had admissions to 17 hospitals in one month

Emergency Room Visits

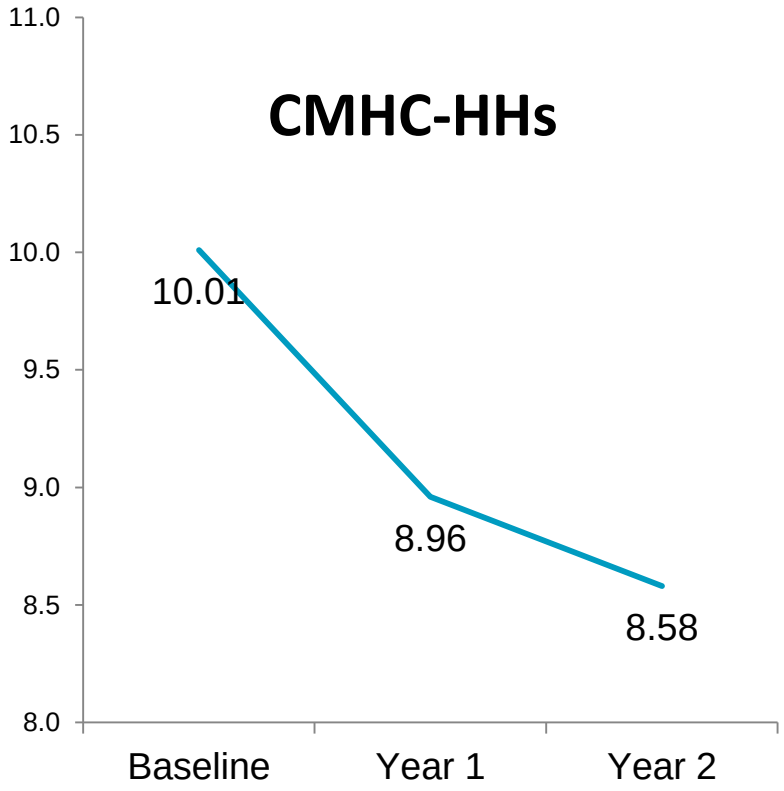
- In response to the anthrax scare following 9/11 all emergency rooms were required to send a notification of every emergency room visit to the state health department
- All new ER visit notifications are sent in an overnight flat file data transfer from the State Health Department to the Health Home analytics unit
- An access database is used to automatically sort the patients by health home and generate an automated email listing those patients with new ER visits to each Health Home Director
- HCHs receive daily e-mails regarding ER visits

Performance Progress

A1c, LDL, and Blood Pressure

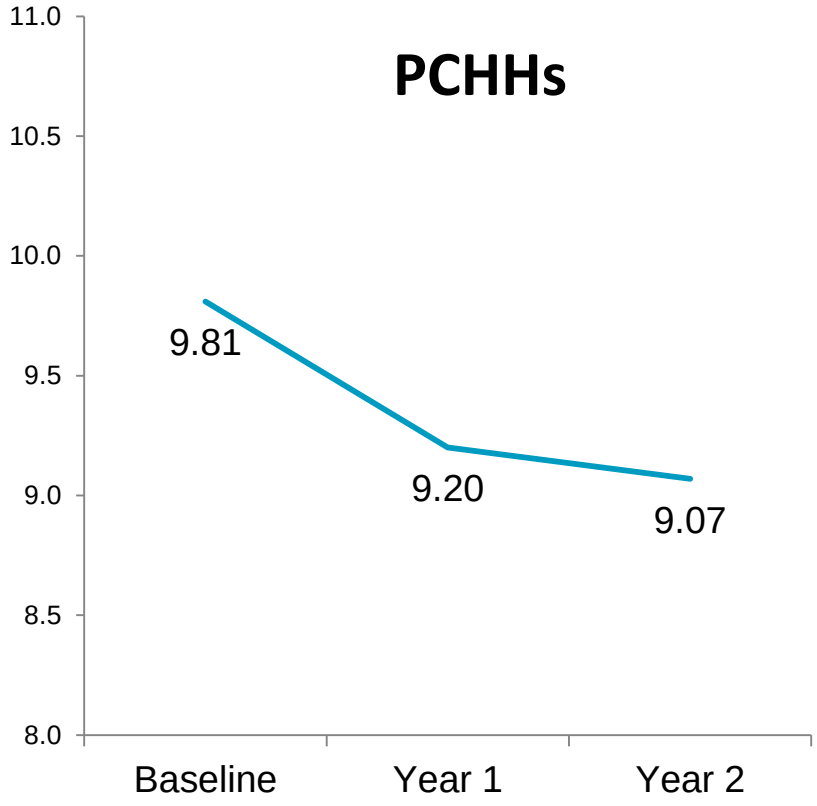
A1C Levels Over Time

About 7% had uncontrolled A1c levels



1 POINT DROP IN A1C

- **21% ↓ in diabetes related deaths**
- **14% ↓ in heart attack**
- **31% ↓ in microvascular complications**



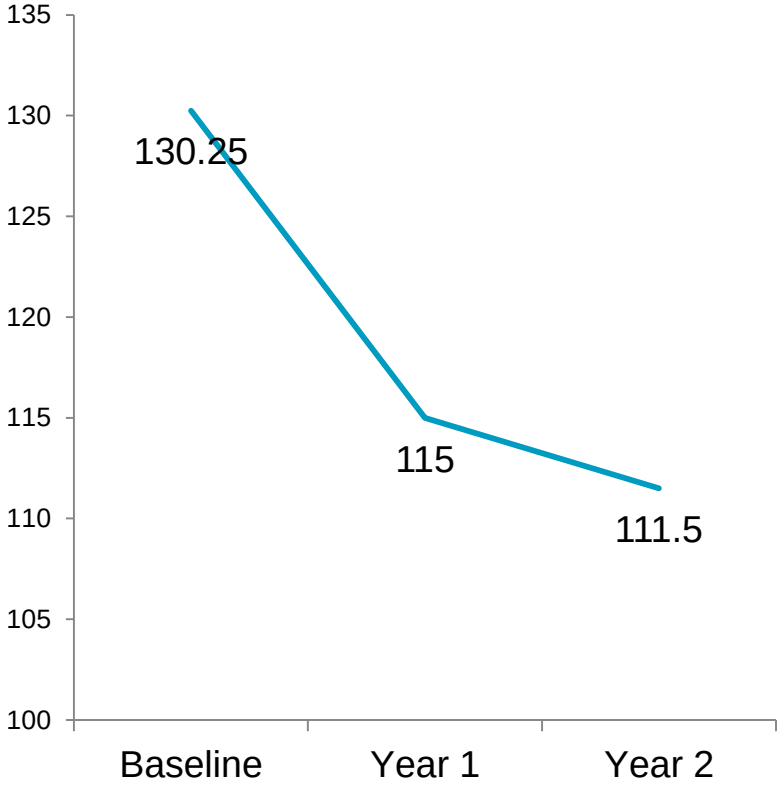
LDL Levels Over Time

About 45% had uncontrolled LDL levels

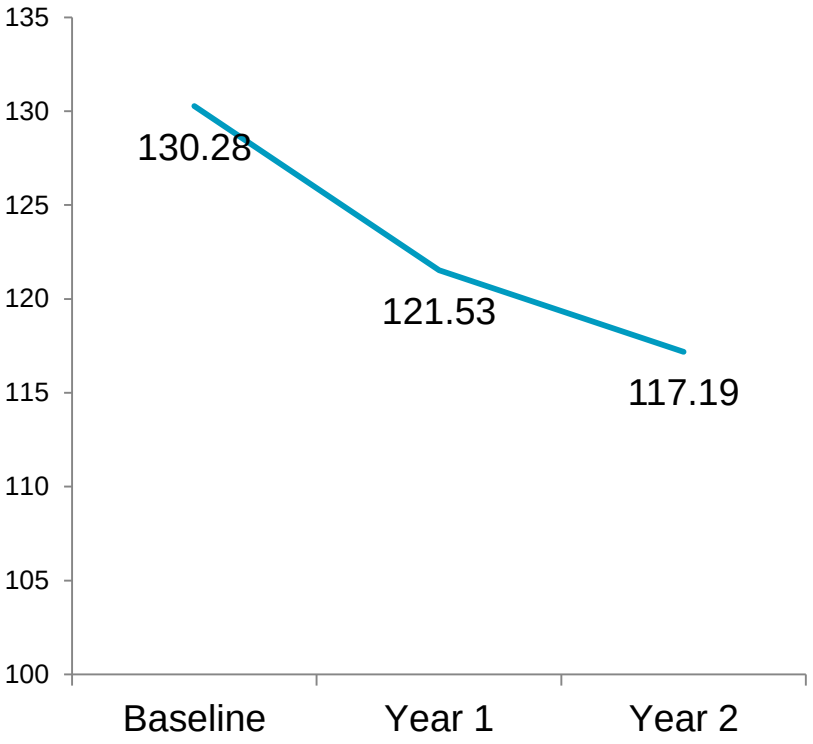
10% DROP IN LDL LEVEL

30% ↓ in cardiovascular disease

CMHC-HHs



PCHHs

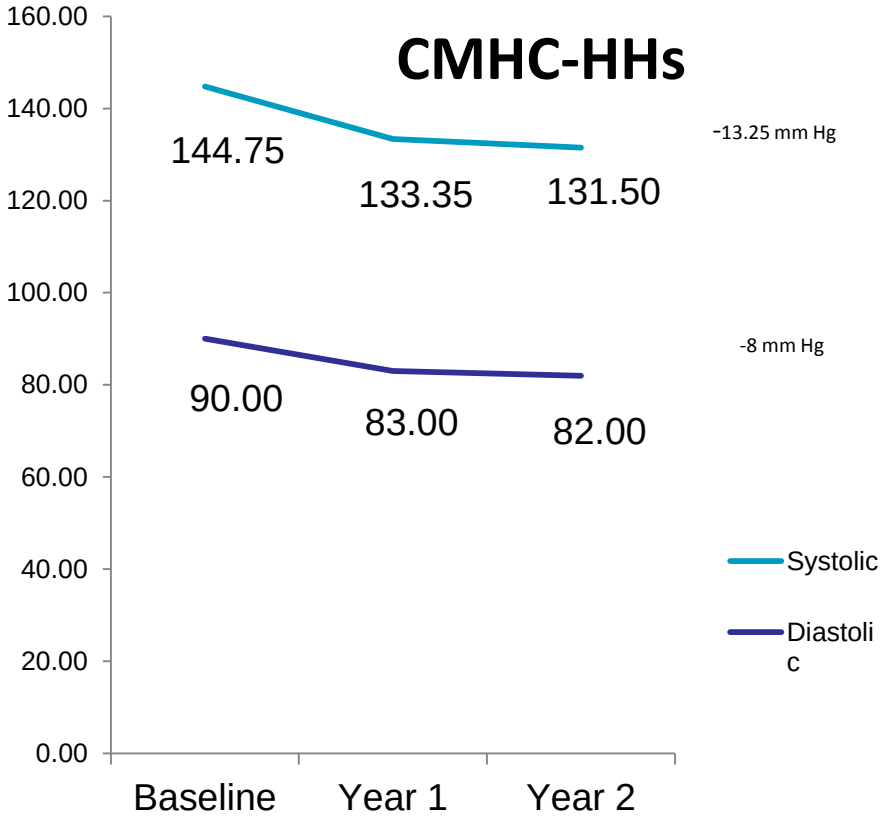


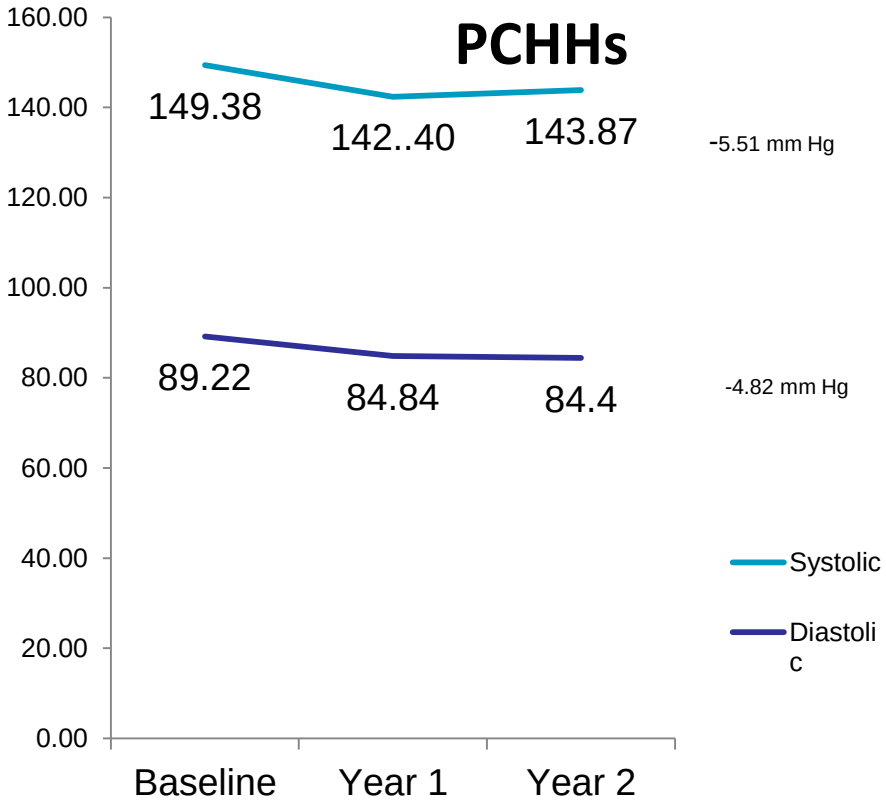
BLOOD PRESSURE
Changes Over Time

6 POINT DROP IN BLOOD PRESSURE

20%-24% had uncontrolled Blood Pressure levels

- **16% ↓ in cardiovascular disease**
- **42% ↓ in stroke**





Hypertension and Cardiovascular Disease

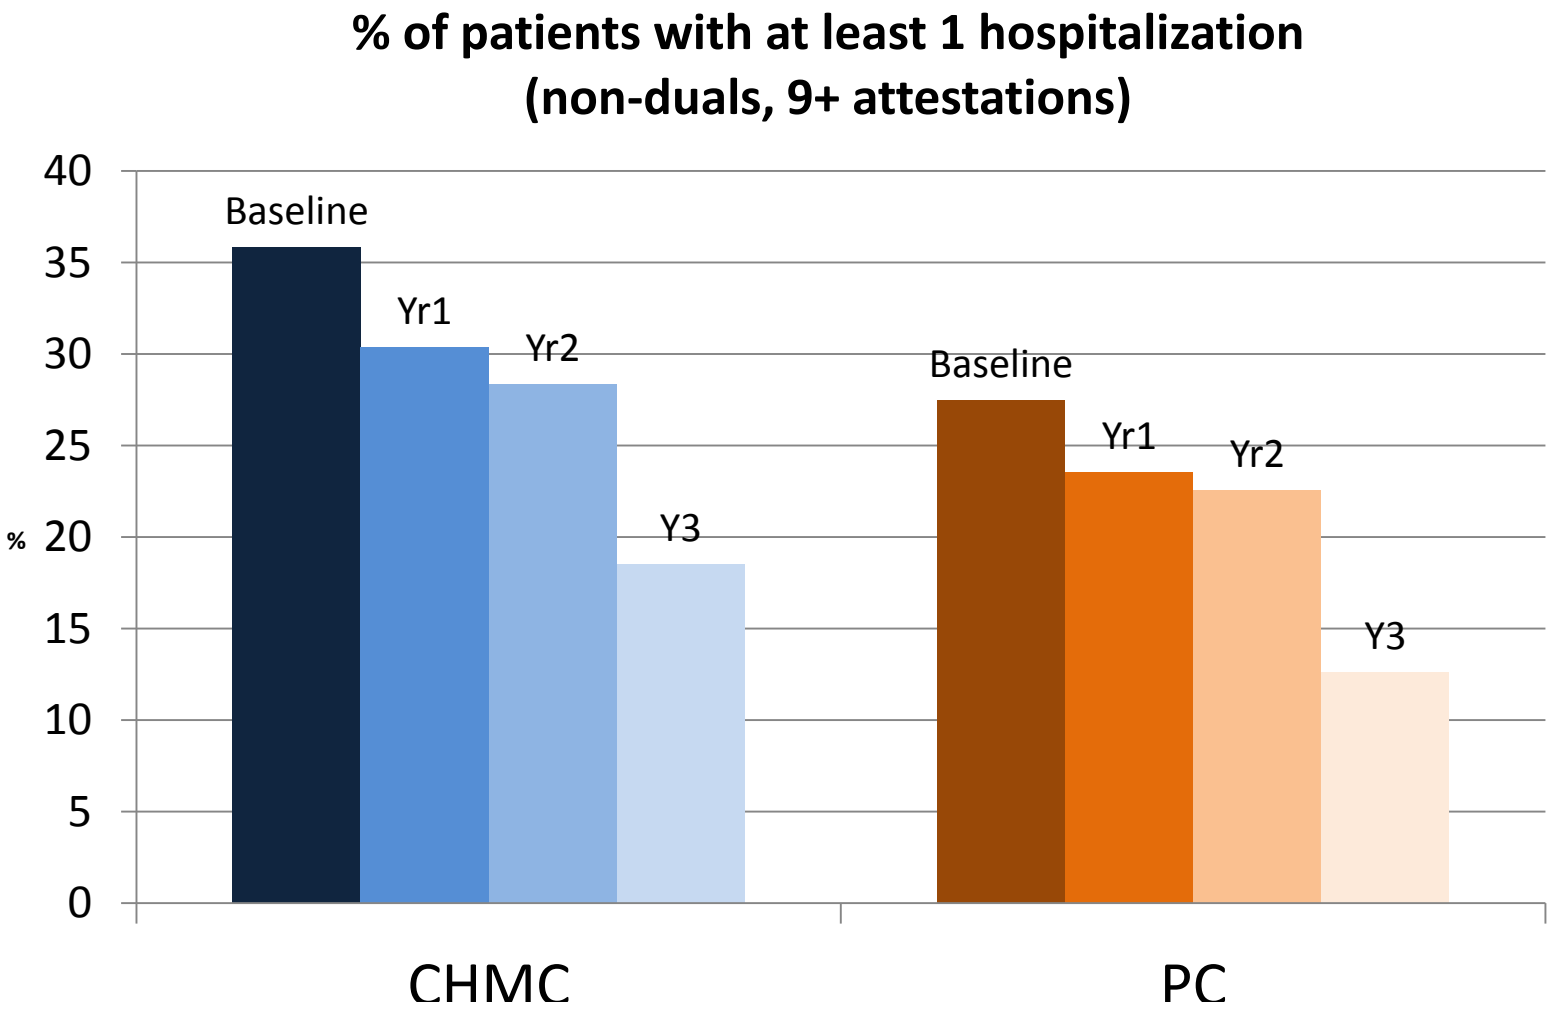
Outcomes
Reducing Hospitalization

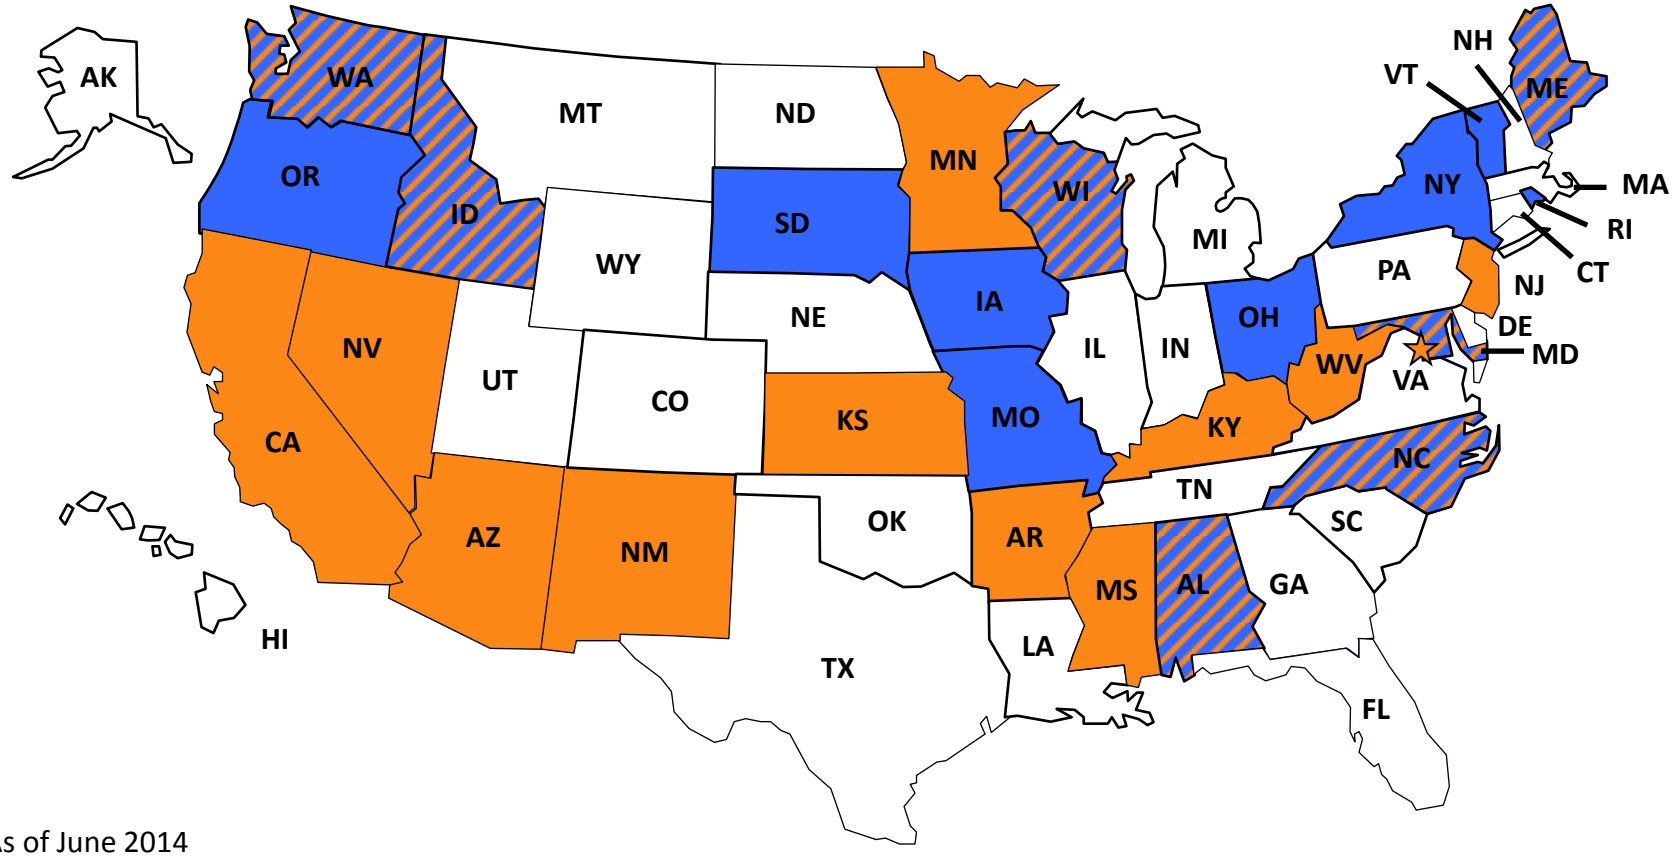


Intial Estimated Cost Savings after 18 Months

- CMHC Health Homes
  - 20,031 persons total served (includes Dual Eligibles)
  - Cost Decreased by $76.33 PMPM
  - Total Cost Reduction $15.7 M

- PC Health Homes
  - 23,354 persons total served (includes Dual Eligibles)
  - Cost Decreased by $30.79 PMPM
  - Total Cost Reduction $7.4 M

ACA Section 2703 Health Homes



As of June 2014

Approved State Plan Amendment(s) (15 States)

Planning Grant (18 States, DC, and Puerto Rico)

Note: *States with stripes have both*

http://www.medicaid.gov/State-Resource-Center/Medicaid-State-Technical-Assistance/Health-Homes-Technical-Assistance/Downloads/HH-MAP_v34.pdf

- ✓ Requires a significant change in the way of thinking and the practice patterns of providers
- ✓ Caring for an entire population and not just for the individual patients who actively seek care
- ✓ Adopt a new way of doing business [1]

"Health information technology is absolutely "necessary but not sufficient" for creating practice-based population health management; *committed executive and clinical leadership*, *care team development*, and *care coordination processes* are also critical success factors."[1]

Planning

phm

[1] Population Health Management: A Roadmap for Provider-Based Automation in a New Era of Healthcare, Institute for Health Technology Transformation, Chase, Alide, et.al.

What Makes it Possible?

- A Relationship of Basic Trust between:
  - Department of Mental Health
  - Mo HealthNet (medicaid)
  - State Budget Office
  - MO Coalition of CMHCs
  - MO Primary Care Association

- Transparent use of data instead of anecdotes to explore and discuss issues
- Willingness of all partners to tolerate and share risk
- Principled Negotiation and Motivational Interviewing

DYSFUNCTION

THE ONLY CONSISTENT FEATURE OF ALL OF YOUR DISSATISFYING RELATIONSHIPS IS YOU.

S.M.R. Covey, The Speed of Trust

Behaviors that Promote Trust

- Character
  - Talk Straight
  - Demonstrate Respect
  - Create Transparency
  - Right Wrongs
  - Show Loyalty
- Competence
  - Deliver Results
  - Get Better
  - Confront Reality
  - Clarify Expectations
  - Practice Accountability
- Character & Competence
  - Listen First
  - Keep Commitments
  - Extend Trust

Partnership Principles

DON'T	DO
Talk about your need first	Ask about their needs first
Expect to get something	Give something
Limit assistance to a project	Assist wherever you can
Make it about this deal	Make it about the next 10
Push a specific position	Pursue common interest
Withhold information	Reveal anything helpful
Let them take their lumps	Take one for the team

What BH Organizations Need to Evolve and Prosper

- A Role no one else wants or can do
- Data, Data, and more Data
- Willingness to Change
- Willingness to Risk
- Integration with the Rest of Health Care
- Training, Training, and more Training

CHANGE

WHEN THE WINDS OF CHANGE BLOW HARD ENOUGH,
THE MOST TRIVIAL OF THINGS CAN TURN INTO DEADLY PROJECTILES.
